

2018 Wage and Benefit Survey Results Released

Employers from the 10 counties of the East Central Indiana Regional Partnership participated in a wage and benefit survey to provide timely data specific to the region. The results are based on confidential, employer-provided information which was used to calculate wages for partnership counties. We want to thank the companies who participated in this survey for their time and effort. Participation helps provide the most accurate picture possible of wages and benefits in the region. Efforts will begin this fall for the 2019 survey and we hope companies will be willing to participate.
